

The SHT850-C is the solution offering maximum flexibility against an optimal usage of valuable jetty space.

Characteristics:

- Simultaneous connection in multiple scenarios, quick and easy
- Allowing cross connections
- No hoses lying on jetty deck

Technical characteristics:

- Manual, hydraulic or electric hydraulic operation
- Hoses supported by telescopic sliding beams
- Sizing from 3" up to 16"
- Design temperature between -170 °C and +200 °C
- Design pressure between vacuum and 50 barg
- Proven and worldwide recognized hoses

Available accessories:

- Drain and purge connection
- Parking sensor
- Manual Quick Connect Disconnect Coupler
- Safety Break Valve
- Product valve at inlet
- Lighting package
- Security camera mounts
- Fire water piping for elevated remote monitor
- Gangway on tower structure
