

The SHT850-K is a combination of rigid piping in a knuckle configuration, swivel joints and a flexible hose, resulting in a large operational envelope and maximum control over the hose.

Characteristics:

- Simultaneous connection in multiple scenarios, quick and easy
- Allowing cross connections
- No hoses lying on jetty deck

Technical characteristics:

- Manual, hydraulic or electric hydraulic operation
- Rigid section operated by winch and hydraulic cylinder
- Sizing from 3" up to 16"
- Design temperature between -170 °C and +200 °C
- Design pressure between vacuum and 50 barg
- Proven and worldwide recognized hoses

Available accessories:

- Drain and purge connection
- Parking sensor & storm lock
- Manual Quick Connect Disconnect Coupler
- Safety Break Valve
- Product valve at inlet
- Vacuum breaker
- Lighting package
- Security camera mounts
- Fire water piping for elevated remote monitor
- Gangway on tower structure
